FLIP // SIGNAL

FULL VIEW
FIELD NOTES

A small demo deck for the local PDF presentation viewer.

01 / NOTICE

Make room for detail.

A good presentation gives every idea enough space to be understood.

Slow down. The small things are often the whole point.

02 / TURN

A page should move.

The gesture makes a sequence feel like a story, not a stack of files.

Keep the focus on what is being shared.

03 / KEEP

The original stays yours.

Your document never leaves this device.

Turn a page. Keep the source.

THANKS FOR READING.
